DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 20-29, and 34-38, drawn to a polymer, classified in class 526, subclass 274.
- II. Claim 13, drawn to a process of producing a polymer, classified in class 526, subclass various.
- III. Claims 14-15, and 30, drawn to another process of making a polymer, classified in class 526, subclass various.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I and III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the polymer of Group I can be made by other viable processes such as grafting U or UF onto a P backbone follow by reaction with compound A.

Art Unit: 1713

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the process expressed in Group II does not involve the reaction of P with the various monomers.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claims 1, 13-14 and 30 are generic to a plurality of disclosed patentably distinct species comprising :

- (1) the phosphorous-containing polymer inclusive of formula (I) and (II)
- (2) the polymer component P, inclusive of the various species i) to vii)
- (3) the phosphorous-containing functional compound/monomer A
- (4) the functional group-containing compound/monomer F
- (5) the oligomeric or polymeric segments made up of identical or different monomer U or UF.

Art Unit: 1713

6. Applicant is required under 35 U.S.C. 121 to elect a single ultimate claimed or disclosed species for each of the (1) to (5) set forth above, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
